

BRIEF BIODATA Of Dr. RAJINDER BHASIN

Dr. Rajinder Bhasin is a Technical Expert at the Norwegian Geotechnical Institute (NGI) and has a doctoral degree in Rock Engineering from the University of Oslo in Norway. He has worked in more than 20 countries around the world and has extensive experience as a Project Leader for several large underground infrastructure projects. These include projects for civilian and strategic purposes and nuclear waste repositories in U.K. and Sweden. He is actively working in South and South-East Asian countries on projects related to underground construction, transportation links and natural disaster mitigation. Dr. Bhasin has worked for more than 20 years at NGI on various challenging projects including World's Largest Underground Stadium where he performed engineering geological mapping and geotechnical logging. He has over 150 published papers in international journals, scientific magazines and in conference proceedings.

Dr. Bhasin is currently the President of the Indian Society for Rock Mechanics and Tunnelling Technology (ISRMTT).
